### Above Ground Pool / Spa Permit Contingencies and Inspection Checklist

**Temporary Barrier**
An outdoor swimming pool shall be surrounded by a 48” high temporary barrier during installation or construction that shall remain in place until a permanent barrier is provided.

Exceptions:
1. Above-ground or on-ground pools where the pool structure constitutes a barrier in compliance with NYS Building Code.
2. Spas or hot tubs with a safety cover which complies with ASTM F1346, provided that such safety cover is in place during the period of installation or construction of such hot tub or spa. The temporary removal of a safety cover as required to facilitate the installation or construction of a hot tub or spa during periods when at least one person engaged in the installation or construction is present is permitted.

**Permanent Barrier** - Swimming pools shall be completely enclosed by a permanent barrier within 90 days of the date of issuance of the building permit or 90 days from the date of commencement of the installation or construction of the swimming pool.

- **Fence as barrier:**
  - The top of the barrier shall be no less than 48 inches above grade measured on the side of the barrier that faces away from the swimming pool. The vertical clearance between grade and the bottom of the barrier shall be not greater than 2 inches measured on the side of the barrier that faces away from the swimming pool. Where the top of the pool structure is above grade, the barrier may be at ground level, or mounted on top of the pool structure. Fence types shall meet the requirements of the NYS Building Code section R326.4.2.
  - All gates shall be self-closing. In addition, if the gate is a pedestrian access gate, the gate shall open outward, away from the pool.
  - All gates shall be self-latching, with the latch handle located within the enclosure (i.e., on the pool side of the enclosure) and at least 40 inches above grade. In addition, if the latch handle is located less than 54 inches from grade, the latch handle shall be located at least 3 inches below the top of the gate, and neither the gate nor the barrier shall have any opening greater than 0.5 inch within 18 inches of the latch handle.
  - All gates shall be securely locked with a key, combination or other child-proof lock sufficient to prevent access to the swimming pool through such gate when the swimming pool is not in use or supervised.

- **Dwelling wall as partial barrier:**
  - Doors with direct access to the pool through that wall shall be equipped with an alarm that produces an audible warning when the door and/or its screen, if present, are opened. Where an alarm is provided, the deactivation switch shall be located 54 inches or more above the threshold of the door.
  - Operable windows in the wall or walls used as a barrier shall have a latching device located no less than 48 inches above the floor. Openings in operable windows shall not allow a 4-inch-diameter sphere to pass through the opening when the window is in its largest opened position;

- **Pool structure as barrier:**
  - As an alternate to a conventional on ground barrier, the barrier for above-ground or on-ground swimming pools, including quick set, inflatable swimming pools, is permitted to be mounted on top of the pool structure or the pool structure may constitute a barrier, where all the following requirements are met:
The structure shall meet the applicable barrier and gate requirements of the NYS Building Code, including among others, a 48-inch height;

The barrier shall be designed "to provide protection against potential drowning and near drowning by sufficiently preventing access to the swimming pool;"

The pool and pool structure must be designed and constructed in compliance with ANSI/APSP/ICC 4, 2012 titled American National Standard for Aboveground/ Onground Residential Swimming Pools;

The pool manufacturer certifies that the pool structure, if used as a barrier or with a barrier mounted on it, is designed with accepted structural engineering practices; and

If the means of access is a ladder or steps, then:
  o the ladder or steps shall be capable of being secured, locked or removed to prevent access; or
  o the ladder or steps shall be surrounded by a complying swimming pool barrier.

Prohibited Locations

Barriers shall be located so as to prohibit permanent structures, equipment or similar objects from being used to climb the barrier.

Pool Alarm

A swimming pool or spa installed, constructed or substantially modified after December 14, 2006, shall be equipped with an approved pool alarm. Pool alarms shall comply with ASTM F2208 (Standard Specification for Pool Alarms), and shall be installed, used and maintained in accordance with the manufacturer's instructions and the NYS Building Code.

Exceptions: A hot tub or spa equipped with a safety cover which complies with ASTM F1346 or a swimming pool (other than a hot tub or spa) equipped with an automatic power safety cover which complies with ASTM F1346.

Entrapment protection for swimming pool and spa suction outlets.

Suction outlets shall be designed to produce circulation throughout the pool or spa. Single-outlet systems, such as automatic vacuum cleaner systems, or multiple suction outlets, whether isolated by valves or otherwise, shall be protected against user entrapment.

Maintenance

The 2020 Property Maintenance Code of New York State requires that all swimming pools, enclosures/barriers, alarms, and entrapment protection be maintained in a clean and sanitary condition, and in good repair.
The following guidelines are intended to assist residents with the minimum code requirements for pools and spas on residential properties. The references below highlight only a portion of the code, a registered design professional must be consulted for a full analysis.

Any questions regarding the process can be answered from 8:30 am – 4:30 pm, Monday to Friday by contacting the Building Department at 516.326.6319 or FPBuildings@FPVillage.org
The Building Department is located at 1 Pool and Garage Road, Floral Park, NY

VILLAGE OF FLORAL PARK ZONING ORDINANCE

§ 99-25. Swimming pools and prefabricated units. [Amended 12-6-2005 by L.L. No. 7-2005]

A. Application of section. No outdoor swimming pool or prefabricated unit shall be constructed, erected or maintained in the Village of Floral Park except in conformity with this chapter, the Municipal Code and all applicable state laws, rules and regulations.

B. Definitions. As used in this chapter, a swimming pool is hereby defined as any structure intended for swimming, bathing or wading, either above or below ground, having a depth for retaining water of 20 inches or more and a capacity of 200 gallons or more. As used in this chapter, a prefabricated unit is hereby defined as a self-contained portable hot tub or spa unit used for recreational purposes and having a maximum capacity of 300 gallons.

C. Permit required. No swimming pool or prefabricated unit shall be constructed, erected or maintained unless a permit for the same shall have been issued by the Superintendent of Buildings. An application for such permit shall be on such form as may be furnished by the Building Department, and shall be accompanied by complete plans and specifications of the pool or prefabricated unit, the plan for the disposal of water, the type and location of fencing and a survey or map showing the location thereof with respect to the boundary lines of the land of the applicant. Permits may be issued only upon application of the owner of the land or his or her agent duly authorized, in writing, to make such application. Applications shall be accompanied by a permit fee established by resolution of the Board of Trustees.

D. Annual renewal required. No swimming pool or prefabricated unit shall be maintained or used after the year of initial installation or construction thereof except after obtaining from the Building Department a permit for such maintenance and use. Such permit shall be obtained each year before any use is made of such swimming pool or prefabricated unit. A fee for said renewal permit shall be in such amount as the Board of Trustees shall determine by resolution.

E. Materials of construction. No swimming pool or prefabricated unit shall be built, constructed or maintained except of materials having adequate strength to retain the water designed to be contained therein. Each swimming pool or prefabricated unit shall be designed in accordance with sound engineering practice.

F. Water disposal. Water overflowing from the swimming pool or prefabricated unit and when the swimming pool or prefabricated unit is emptied shall be disposed of on the owner's land and shall be prevented from
flowing over or into the land of any adjoining property owner or over or into any abutting street, or into any storm sewer. All water must be disposed of through the homeowner's sanitary sewer system.

G. Fencing. Fencing shall be in compliance with the provisions of the New York State Residential Code.

H. Perimeter required. There shall be a perimeter of at least five feet around a swimming pool, which perimeter shall be between the edge of the swimming pool and the fence erected around the swimming pool.

I. Lighting. No lighting shall be permitted in, on or about said swimming pool, except such lighting that shall shine into or upon said swimming pool and cast no light or reflections onto abutting properties. All electrical work shall be performed by a licensed electrician in accordance with the provisions of the National Electrical Code.

J. Abandonment. Should the owner abandon the swimming pool, he or she shall arrange to remove the depression and return the surface of the ground to its original grade and approximately in the same condition as before the swimming pool was constructed, and he or she shall further notify the Superintendent of Buildings of the abandonment so that the inspection of the site may be made and the records of the permit may be marked accordingly.

K. Location. Every swimming pool and prefabricated unit shall conform to the following requirements as to location:

1. Not less than a distance of five feet from any rear or side line of the lot, but not less than 10 feet from any lot line along an abutting street or along a side or front yard on any contiguous lot; provided, however, that each of the foregoing distances shall be increased by one foot for each 100 square feet by which the area of the plane surface of water of any pool exceeds (or would exceed if the pool were completely filled) 500 square feet.

2. Not less than a distance of 10 feet from any cesspool or any part of a sewage disposal system (other than a sewer main).

3. All swimming pools shall have a distance of not less than 10 feet from any main building and not less than five feet from any accessory building.

4. All prefabricated units shall have a distance of not less than five feet away from any accessory structure.

4. In addition, a private outdoor pool shall be located only in a rear yard, and the coverage thereof shall not exceed 30% of the area of the rear yard for all accessory buildings and structures located therein; provided, however, that no such pool shall occupy more than 15% of the area of any rear yard.

L. Enforcement. The Enforcement Office shall be empowered to enforce the regulations herein set forth and to compel the removal of any swimming pool or prefabricated unit that fails to meet the requirements as to installation or proper maintenance of the swimming pool or prefabricated unit, water disposal and appurtenances.

M. Compliance. The owner of any land upon which a swimming pool or prefabricated unit shall have been constructed prior to the date of adoption of the local law from which this chapter is derived shall obtain a permit and comply with the requirements contained herein.

N. Penalties. Any person violating any provisions of this chapter shall be punished as provided in § 99-63 of this Municipal Code.
NEW YORK STATE RESIDENTIAL BUILDING CODE 2020

SECTION R326

SWIMMING POOLS, SPAS AND HOT TUBS

[NY] R326.1 General. The provisions of this section shall control the design and construction as well as substantial modification of swimming pools, spas and hot tubs installed in or on the lot of dwellings regulated under this code, and detached one- and two-family dwellings classified as Group R-3 and constructed under the Building Code of New York State.

Exception: Communal pools for the shared use of multiple townhouse units shall be regulated by the Building Code of New York State.

[NY] R326.1.1 Compliance with other sections. Swimming pools, spas and hot tubs shall comply with this section and other applicable sections of this code. The requirements of this section and of the other applicable sections of this code shall be in addition to, and not in replacement of or substitution for, the requirements of other applicable federal, state and local laws and regulations, including, but not necessarily limited to the requirements of Section 8003 (Federal swimming pool and spa drain cover standard) of Title 15 of the United States Code (CPSC 15 USC 8003), where applicable.

[NY] R326.2 Definitions. For the purpose of these requirements, the terms used shall be defined as follows and as set forth in Chapter 2.

BARRIER, PERMANENT. A fence, the walls of a permanent structure, any other structure or combination thereof which completely surrounds the swimming pool and sufficiently obstructs access to the swimming pool.

BARRIER, TEMPORARY. An approved temporary fence, permanent fence, the walls of a permanent structure, any other structure, or any combination thereof that sufficiently prevents access to the swimming pool by any person not engaged in the installation or construction of the swimming pool during its installation or construction.

HOT TUB. See “Spa.”

RESIDENTIAL. That which is situated on the premises of dwellings regulated under this code, and detached dwellings classified as R-3 and constructed under the Building Code of New York State.

SPA. A portable or nonportable structure intended for recreational or therapeutic bathing, in which all controls, water heating and water-circulating equipment are an integral part of the product. Spas are shallow in depth and are not designed for swimming or diving.

SUBSTANTIAL DAMAGE. For the purpose of determining compliance with the pool alarm provisions of this section, damage of any origin sustained by a swimming pool, whereby the cost of restoring the swimming pool to its before-damaged condition would equal or exceed 50 percent of the market value of the swimming pool before the damage occurred.

SUBSTANTIAL MODIFICATION. For the purpose of determining compliance with the pool alarm provisions of this section, any repair, alteration, addition or improvement of a swimming pool, the cost of which equals or exceeds 50 percent of the market value of the swimming pool before the improvement or repair is started. If a swimming pool has sustained substantial damage, any repairs are considered substantial modification regardless of the actual repair work performed.

SUCTION OUTLET. A fitting, fitting assembly, cover/ grate, sump, and related components that provide a localized low-pressure area for the transfer of water from a swimming pool.

SWIMMING POOL. Any structure, basin, chamber or tank which is intended for swimming, diving, recreational bathing or wading and which contains, is designed to contain, or is capable of containing water more than 24 inches (610 mm) deep at any point. This includes in-ground, above-ground and on-ground pools, indoor pools, hot tubs, spas, and wading pools.

SWIMMING POOL, INDOOR. A swimming pool which is totally contained within a structure and surrounded on all four sides by the walls of the enclosing structure.

SWIMMING POOL, OUTDOOR. Any swimming pool which is not an indoor pool.

[NY] R326.3 Compliance with other standards.

[NY] R326.3.2 Above-ground and on-ground pools.

[NY] R326.4 Barriers, application. The provisions of this section shall control the design of barriers for swimming pools, spas and hot tubs. These design controls are intended to provide protection against potential drowning and near drowning by sufficiently preventing access to swimming pools, spas and hot tubs by persons outside the property, persons within the dwelling, and persons in other parts of the property not contained within the pool enclosure.

[NY] R326.4.1 Temporary barriers. An outdoor swimming pool shall be surrounded by a temporary barrier during installation or construction that shall remain in place until a permanent barrier in compliance with Section R326.4.2 is provided. Exceptions:
1. Above-ground or on-ground pools where the pool structure constitutes a barrier in compliance with Section R326.4.2.9.
2. Spas or hot tubs with a safety cover which complies with ASTM F1346, provided that such safety cover is in place during the period of installation or construction of such hot tub or spa. The temporary removal of a safety cover as required to facilitate the installation or construction of a hot tub or spa during periods when at least one person engaged in the installation or construction is present is permitted.

[NY] R326.4.1.1 Height. The top of the temporary barrier shall be at least 48 inches (1219 mm) above grade measured on the side of the barrier which faces away from the swimming pool.

[NY] R326.4.1.2 Replacement by a permanent barrier. A temporary barrier shall be replaced by a complying permanent barrier within either of the following periods:
1. 90 days of the date of issuance of the building permit for the installation or construction of the swimming pool; or
2. 90 days of the date of commencement of the installation or construction of the swimming pool.

[NY] R326.4.1.2.1 Replacement extension. Subject to the approval of the building official, the time period for completion of the permanent barrier may be extended for good cause, including, but not limited to, adverse weather conditions delaying construction.

[NY] R326.4.2 Permanent barriers. Swimming pools shall be completely enclosed by a permanent barrier complying with Sections R326.4.2.1 through R326.4.2.6.

[NY] R326.4.2.1 Barrier height and clearances. The top of the barrier shall be no less than 48 inches (1219 mm) above grade measured on the side of the barrier that faces away from the swimming pool. The vertical clearance between grade and the bottom of the barrier shall be not greater than 2 inches (51 mm) measured on the side of the barrier that faces away from the swimming pool. Where the top of the pool structure is above grade, the barrier may be at ground level, or mounted on top of the pool structure. Where the barrier is mounted on top of the pool structure, the barrier shall comply with Sections R326.4.2.2 and R326.4.2.3.

[NY] R326.4.2.2 Solid barrier surfaces. Solid barriers which do not have openings shall not contain indentations or protrusions except for normal construction tolerances and tooled masonry joints.

[NY] R326.4.2.3 Closely spaced horizontal members. Where the barrier is composed of horizontal and vertical members and the distance between the tops of the horizontal members is less than 45 inches (1143 mm), the horizontal members shall be located on the swimming pool side of the fence. Spacing
between vertical members shall not exceed 13/4 inches (44 mm) in width. Where there are decorative cutouts within vertical members, spacing within the cutouts shall be not greater than 13/4 inches (44 mm) in width.

[NY] R326.4.2.4 Widely spaced horizontal members. Where the barrier is composed of horizontal and vertical members and the distance between the tops of the horizontal members is 45 inches (1143 mm) or more, spacing between vertical members shall be not greater than 4 inches (102 mm). Where there are decorative cutouts within vertical members, spacing within the cutouts shall be not greater than 13/4 inches (44 mm) in width.

[NY] R326.4.2.5 Chain link dimensions. Maximum mesh size for chain link fences shall be a 2 1/4 inch (57 mm) square, unless the fence has vertical slats fastened at the top or the bottom which reduce the openings to not more than 13/4 inches (44 mm).

[NY] R326.4.2.6 Diagonal members. Where the barrier is composed of diagonal members, the maximum opening formed by the diagonal members shall be not greater than 13/4 inches (44 mm).

[NY] R326.4.2.7 Gates. Gates shall comply with the requirements of Sections R326.4.2.1 through R326.4.2.6, and with the following requirements:

[NY] R326.4.2.7.1 Self-closing and opening configuration. All gates shall be self-closing. In addition, if the gate is a pedestrian access gate, the gate shall open outward, away from the pool.

[NY] R326.4.2.7.2 Latching. All gates shall be self-latching, with the latch handle located within the enclosure (i.e., on the pool side of the enclosure) and at least 40 inches (1016 mm) above grade. In addition, if the latch handle is located less than 54 inches (1372 mm) from grade, the latch handle shall be located at least 3 inches (76 mm) below the top of the gate, and neither the gate nor the barrier shall have any opening greater than 0.5 inch (12.7 mm) within 18 inches (457 mm) of the latch handle.

[NY] R326.4.2.7.3 Locking. All gates shall be securely locked with a key, combination or other child-proof lock sufficient to prevent access to the swimming pool through such gate when the swimming pool is not in use or supervised.

[NY] R326.4.2.8 Dwelling wall as barrier. A wall or walls of a dwelling may serve as part of the barrier, provided that the wall or walls meet the applicable barrier requirements of Sections R326.4.2.1 through R326.4.2.6, and one of the following conditions shall be met:
1. a) Doors with direct access to the pool through that wall shall be equipped with an alarm that produces an audible warning when the door and/or its screen, if present, are opened. The alarm shall be listed in accordance with UL 2017. The audible alarm shall activate within 7 seconds and sound continuously for a minimum of 30 seconds after the door and/or its screen, if present, are opened and be capable of being heard throughout the house during normal household activities. The alarm shall automatically reset under all conditions. The alarm system shall be equipped with a manual means, such as touch pad or switch, to temporarily deactivate the alarm for a single opening. Deactivation shall last for not more than 15 seconds; and
b) Operable windows in the wall or walls used as a barrier shall have a latching device located no less than 48 inches above the floor. Openings in operable windows shall not allow a 4-inch-diameter (102 mm) sphere to pass through the opening when the window is in its largest opened position; and
c) Where the dwelling is wholly contained within the pool barrier or enclosure, alarms shall be provided at every door with direct access to the pool; or
2. Other approved means of protection, such as self-closing with self-latching devices, so long as the degree of protection afforded is not less than the protection afforded by Item 1 described above.

[NY] R326.4.2.8.1 Alarm deactivation switch location. Where an alarm is provided, the deactivation switch shall be located 54 inches (1372 mm) or more above the threshold of the door. In dwellings required to be Accessible units, Type A units, or Type B units, the deactivation switch shall be located 48 inches (1219 mm) above the threshold of the door.
[NY] **R326.4.2.9 Pool structure as barrier.** Where an above-ground pool structure is used as a barrier, or where the barrier is mounted on top of the pool structure, the structure shall be designed and constructed in compliance with ANSI/APSP/ICC 4 and meet the applicable barrier requirements of Sections R326.4.2.1 through R326.4.2.8. Where the means of access is a ladder or steps, one of the following conditions shall be met:

1. The ladder or steps shall be capable of being secured, locked or removed to prevent access. When the ladder or steps are secured, locked or removed, any opening created shall not allow the passage of a 4-inch-diameter (102 mm) sphere; or
2. The ladder or steps shall be surrounded by a barrier which meets the requirements of Sections R326.4.2.1 through R326.4.2.8.

[NY] **R326.4.3 Indoor swimming pool.** Walls surrounding an indoor swimming pool shall comply with Section R326.4.2.8.

[NY] **R326.4.4 Prohibited locations.** Barriers shall be located so as to prohibit permanent structures, equipment or similar objects from being used to climb the barrier.

[NY] **R326.5 Entrapment protection for swimming pool and spa suction outlets.** Suction outlets shall be designed to produce circulation throughout the pool or spa. Single-outlet systems, such as automatic vacuum cleaner systems, or multiple suction outlets, whether isolated by valves or otherwise, shall be protected against user entrapment.

[NY] **R326.5.1 Compliance.** Suction outlets shall be designed and installed in accordance with the requirements of CPSC 15 USC 8003 and ANSI/APSP/ICC 7, where applicable.

[NY] **R326.6 Suction outlets.** Suction outlets shall be designed to produce circulation throughout the pool or spa. Single-outlet systems, such as automatic vacuum cleaner systems, or multiple suction outlets, whether isolated by valves or otherwise, shall be protected against user entrapment.

[NY] **R326.6.1 Compliance alternative.** Suction outlets may be designed and installed in accordance with ANSI/APSP/ICC 7.

[NY] **R326.6.2 Suction fittings.** Pool and spa suction outlets shall have a cover that conforms to ANSI/ASME A112.19.8, or an 18 inch by 23 inch (457 mm by 584 mm) drain grate or larger, or an approved channel drain system.

**Exception:** Surface skimmers.

[NY] **R326.6.3 Atmospheric vacuum relief system required.** Pool and spa single- or multiple-outlet circulation systems shall be equipped with atmospheric vacuum relief should grate covers located therein become missing or broken. This vacuum relief system shall include at least one approved or engineered method of the type specified herein, as follows:

1. Safety vacuum release system conforming to ASME A112.19.17; or
2. An approved gravity drainage system.

[NY] **R326.6.4 Dual drain separation.** Single or multiple pump circulation systems have a minimum of two suction outlets of the approved type. A minimum horizontal or vertical distance of 3 feet (914 mm) shall separate the outlets. These suction outlets shall be piped so that water is drawn through them simultaneously through a vacuum relief-protected line to the pump or pumps.

[NY] **R326.6.5 Pool cleaner fittings.** Where provided, vacuum or pressure cleaner fitting(s) shall be located in an accessible position(s) at least 6 inches (152 mm) and not more than 12 inches (305 mm) below the minimum operational water level or as an attachment to the skimmer(s).

[NY] **R326.7 Swimming pool and spa alarms, applicability.**
A swimming pool or spa installed, constructed or substantially modified after December 14, 2006, shall be equipped with an approved pool alarm. Pool alarms shall comply with ASTM F2208 (Standard Specification for Pool Alarms), and shall be installed, used and maintained in accordance with the manufacturer's instructions and this section.

**Exceptions:**
1. A hot tub or spa equipped with a safety cover which complies with ASTM F1346.
2. A swimming pool (other than a hot tub or spa) equipped with an automatic power safety cover which complies with ASTM F1346.

[NY] R326.7.1 Multiple alarms. A pool alarm must be capable of detecting entry into the water at any point on the surface of the swimming pool. If necessary, to provide detection capability at every point on the surface of the swimming pool, more than one pool alarm shall be provided.

[NY] R326.7.2 Alarm activation. Pool alarms shall activate upon detecting entry into the water and shall sound poolside and inside the dwelling.

[NY] R326.7.3 Prohibited alarms. The use of personal immersion alarms shall not be construed as compliance with this section.
Code Outreach Program – Above-Ground Swimming Pool Barrier Requirements

This document is intended to clarify some of the barrier requirements applicable to new or substantially modified residential above ground swimming pools. Those reviewing plans for the installation, or substantial modification, of a swimming pool should review the full text of the provisions found in the Uniform Code as well as the local laws, ordinances, codes, and regulations of the municipality where the pool is to be installed for any further requirements.

The word “residential,” as used in this document, applies to pools accessory to one- and two-family dwellings regulated by the 2020 Residential Code of New York State (2020 RCNYS) and to pools accessory to detached one- and two-family dwellings classified as Group R-3 occupancies constructed under the 2020 Building Code of New York State (2020 BCNYS). Provisions for communal swimming pools accessory to townhouses and swimming pools accessory to other buildings regulated by the 2020 BCNYS, can be found in Section 3109 of the 2020 BCNYS. The provisions for residential pools are found in Section R326 of the 2020 RCNYS.

The 2020 RCNYS defines a swimming pool as “any structure, basin, chamber or tank which is intended for swimming, diving, recreational bathing or wading and which contains, is designed to contain, or is capable of containing water more than 24 inches (610 mm) deep at any point. This includes in-ground, above-ground and on-ground pools, indoor pools, hot tubs, spas, and wading pools.”

New or substantially modified swimming pools are required to be provided with temporary barriers during installation (see Section R326.4.1) and with permanent barriers thereafter. The permanent barrier requirements are found in Section R326.4.2 and include heights, clearances, and opening size and configuration.

In accordance with Section R326.4.2.9, as an alternate to a conventional on ground barrier, the barrier for above-ground or on-ground swimming pools, including quick set, inflatable swimming pools, is permitted to be mounted on top of the pool structure or the pool structure may constitute a barrier, where all the following requirements are met:

1. the structure shall meet the applicable barrier and gate requirements of Section R326.4.2, including among others, a 48-inch height (see Section R326.4.2.9);
2. the barrier is designed “to provide protection against potential drowning and near drowning by sufficiently preventing access to [the] swimming” pool (see Section R326.4);
3. the pool and pool structure must be designed and constructed in compliance with ANSI/APSP/ICC 4, 2012 titled American National Standard for Aboveground/Onground Residential Swimming Pools (see Section R326.4.2.9);
4. the pool manufacturer certifies that the pool structure, if used as a barrier or with a barrier mounted on it, is designed with accepted structural engineering practices (see Section 6.1 of ANSI/APSP/ICC 4); and
5. if the means of access is a ladder or steps, then:
   a. the ladder or steps shall be capable of being secured, locked or removed to prevent access; or
   b. the ladder or steps shall be surrounded by a complying swimming pool barrier. See Section R326.4.2.9 (1) and (2).

A wall, or walls, of a dwelling may also serve as part of the barrier, provided that they meet the applicable barrier requirements of Section R326.4.2. Barriers shall be located in a manner that prohibits permanent structures, equipment, or similar objects from being used to climb the barrier.

Other requirements of the 2020 RCNYS are applicable, including requirements for gates, pool alarms, and entrapment protection.

The 2020 Property Maintenance Code of New York State requires that all swimming pools, enclosures/barriers, alarms, and entrapment protection be maintained in a clean and sanitary condition, and in good repair.

Please look for our next edition of the Code Outreach Program at the beginning of next month.
